PROFILE

Computer Science and Engineering student with hands-on experience in Full-Stack Development, Artificial Intelligence, Workflow Automation, and Retrieval-Augmented Generation (RAG) systems. Focused on building practical AI and full-stack solutions while strengthening software development and problem-solving skills.

PROJECTS

AI Research Agent

HTML, CSS, JavaScript, n8n

- Built an AI-powered research presentation generator using workflow automation.
- Automated content generation and email delivery using n8n.
- Structured the workflow to move from research content generation to presentation-ready output.

RAG Streamlit - Intelligent Document Assistant

Python, Streamlit, OCR, RAG

- Developed a document analysis system supporting PDFs, images, and documents.
- Integrated OCR support for extracting usable text from image-based content.
- Enabled question-answering over uploaded content using a Retrieval-Augmented Generation (RAG) approach.

ProposAI - AI Grant Proposal Generator

Python, Generative AI

- Developed an AI-powered grant proposal generation platform.
- Automated professional proposal creation from user inputs.
- Organized user-provided information into a focused proposal-generation workflow.
